Mathematics Mark scheme for Test 1 Tiers 3–5, 4–6, 5–7 & 6–8

Introduction

The markers will follow the mark scheme in this booklet, which is provided here to inform teachers.

This booklet contains the mark scheme for paper 1 at all tiers. The paper 2 mark scheme is printed in a separate booklet. Questions have been given names so that each one has a unique identifier irrespective of tier.

The structure of the mark schemes

The marking information for questions is set out in the form of tables, which start on page 12 of this booklet. The columns on the left-hand side of each table provide a quick reference to the tier, question number, question part and the total number of marks available for that question part.

The Correct response column usually includes two types of information:

- a statement of the requirements for the award of each mark, with an indication of whether credit can be given for correct working, and whether the marks are independent or cumulative
- examples of some different types of correct response, including the most common.

The **Additional guidance** column indicates alternative acceptable responses, and provides details of specific types of response that are unacceptable. Other guidance, such as when 'follow-through' is allowed, is provided as necessary.

Questions with a UAM element are identified in the mark scheme by an encircled U with a number that indicates the significance of using and applying mathematics in answering the question. The U number can be any whole number from 1 to the number of marks in the question.

For graphical and diagrammatic responses, including those in which judgements on accuracy are required, marking overlays have been provided as the centre pages of this booklet.

General guidance

Using the mark schemes

Answers that are numerically equivalent or algebraically equivalent are acceptable unless the mark scheme states otherwise.

In order to ensure consistency of marking, the most frequent procedural queries are listed on the following two pages with the prescribed correct action. This is followed by further guidance relating specifically to the marking of questions that involve money, negative numbers, algebra, time, coordinates or probability. Unless otherwise specified in the mark scheme, markers should apply the following guidelines in all cases.

| The pupil's response does not match closely any of the examples given. | Markers should use their judgement in deciding whether the response corresponds with the statement of requirements given in the Correct response column. Refer also to the Additional guidance . |
|--|--|
| The pupil has responded in a non-standard way. | Calculations, formulae and written responses do not have to be set out in any particular format. Pupils may provide evidence in any form as long as its meaning can be understood. Diagrams, symbols or words are acceptable for explanations or for indicating a response. Any correct method of setting out working, however idiosyncratic, is acceptable. Provided there is no ambiguity condone the continental practice of using a comma for a decimal point. |
| The pupil has made a conceptual error. | In some questions, a method mark is available provided the pupil has made a computational, rather than conceptual, error. A computational error is a 'slip' such as writing $4 \times 6 = 18$ in an otherwise correct long multiplication. A conceptual error is a more serious misunderstanding of the relevant mathematics; when such an error is seen, no method marks may be awarded. Examples of conceptual errors are: misunderstanding of place value, such as multiplying by 2 rather than 20 when calculating 35×27 ; subtracting the smaller value from the larger in calculations such as $45 - 26$ to give the answer 21; incorrect signs when working with negative numbers. |
| The pupil's accuracy is marginal according to the overlay provided. | Overlays can never be 100% accurate. However, provided the answer is within, or touches, the boundaries given, the mark(s) should be awarded. |
| The pupil's answer correctly follows through from earlier incorrect work. | Follow-through marks may be awarded only when specifically stated in the mark scheme, but should not be allowed if the difficulty level of the question has been lowered. Either the correct response or an acceptable follow-through response should be marked as correct. |
| There appears to be a misreading affecting the working. | This is when the pupil misreads the information given in the question and uses different information. If the original intention or difficulty level of the question is not reduced, deduct one mark only. If the original intention or difficulty level is reduced, do not award any marks for the question part. |
| The correct answer is in the wrong place. | Where a pupil has shown understanding of the question, the mark(s) should be given. In particular, where a word or number response is expected, a pupil may meet the requirement by annotating a graph or labelling a diagram elsewhere in the question. |

| The final answer is wrong but the correct answer is | Where appropriate, detailed guidance will be given in the mark scheme and must be adhered to. If no guidance is given, markers will need to examine each case to decide whether: | | | | |
|--|---|--|--|--|--|
| shown in the working. | • the incorrect answer is due to a transcription error If so, award the mark. | | | | |
| | in questions not testing accuracy, the correct answer has been given but then rounded or truncated | If so, award the mark | | | |
| | the pupil has continued to give redundant extra working which does not contradict work already done | If so, award the mark | | | |
| | the pupil has continued, in the same part of the question, to give redundant extra working which does contradict work already done. | If so, do not award the mark. Where a question part carries more than one mark, only the final mark should be withheld. | | | |
| The pupil's answer is correct but the wrong working is seen. | A correct response should always be marked as correct scheme states otherwise. | unless the mark | | | |
| The correct response has been crossed or rubbed out and not replaced. | Mark, according to the mark scheme, any legible cross work that has not been replaced. | ed or rubbed out | | | |
| More than one answer is given. | If all answers given are correct or a range of answers is given, all of which a correct, the mark should be awarded unless prohibited by the mark scheme. If both correct and incorrect responses are given, no mark should be award | | | | |
| The answer is correct but, in a later part of the question, the pupil has contradicted this response. | A mark given for one part should not be disallowed fo given in a different part, unless the mark scheme specif | | | | |

Marking specific types of question

| Responses involving money For example: £3.20 £7 | | | | | | |
|---|--|--|--|--|--|--|
| Accept ✓ | Do not accept x | | | | | |
| ✓ Any unambiguous indication of the correct amount eg £3.20(p), £3 20, £3,20, 3 pounds 20, £3-20, £3 20 pence, £3:20, £7.00 | Incorrect or ambiguous indication of the amount eg £320, £320p or £700p | | | | | |
| ✓ The unit, £ or p, is usually printed in the answer space. Where the pupil writes an answer outside the answer space with no units, accept responses that are unambiguous when considered alongside the given units eg with £ given in the answer space, accept 3.20 7 or 7.00 ✓ Given units amended eg with £ crossed out in the answer space, accept 320p 700p | Ambiguous use of units outside the answer space eg with £ given in the answer space, do not accept 3.20p outside the answer space Incorrect placement of decimal points, spaces, etc or incorrect use or omission of 0 eg £3.2, £3 200, £32 0, £3-2-0, £7.0 | | | | | |

| Responses involving i For example: –2 | Pesponses involving negative numbers or example: -2 | | |
|---|--|--|--|
| Accept ✓ | Do not accept × | | |
| | To avoid penalising the error below more than once within each question, do not award the mark for the <i>first</i> occurrence of the error within each question. Where a question part carries more than one mark, only the final mark should be withheld. ✗ Incorrect notation eg 2- | | |

| Responses involving the use of For example: $2 + n$ $n + 2$ $2n$ $\frac{n}{2}$ | |
|--|---|
| Accept √ | Take care ! Do not accept x |
| ✓ Unambiguous use of a different case or variable eg N used for n x used for n | ! Unconventional notation eg $n \times 2$ or $2 \times n$ or $n2$ or $n + n$ for $2n$ $n \times n$ for n^2 $n \div 2$ for $\frac{n}{2}$ or $\frac{1}{2}n$ 2 + 1n for $2 + n2 + 0n$ for $2Within a question that demandssimplification, do not accept as partof a final answer involving algebra.Accept within a method whenawarding partial credit, or within anexplanation or general working.$ |
| | Embedded values given when solving equations eg in solving $3x + 2 = 32$, $3 \times 10 + 2 = 32$ for $x = 10$ |
| | To avoid penalising the two types of error below more than once within each question, do not award the mark for the <i>first</i> occurrence of each type within each question. Where a question part carries more than one mark, only the final mark should be withheld. |
| ✓ Words used to precede or follow equations or expressions eg $t = n + 2$ tiles or tiles = $t = n + 2$ for $t = n + 2$ | Words or units used within equations or expressions eg n tiles + 2 n cm + 2 Do not accept on their own. Ignore if accompanying an acceptable response. |
| ✓ Unambiguous letters used to indicate expressions eg $t = n + 2$ for $n + 2$ | Ambiguous letters used to indicate expressions eg $n = n + 2$ for $n + 2$ |

| Responses involving time A time interval For example: 2 hours 30 minutes | | | | | |
|---|---|--|--|--|--|
| Accept ✓ | Take care ! Do not accept x | | | | |
| ✓ Any unambiguous indication eg 2.5 (hours), 2h 30 ✓ Digital electronic time ie 2:30 | Incorrect or ambiguous time interval eg 2.3(h), 2.30, 2-30, 2h 3, 2.30 min The unit, hours and/or minutes, is usually printed in the answer space. Where the pupil writes an answer outside the answer space, or crosses out the given unit, accept answers with correct units, unless the question has specifically asked for other units to be used. | | | | |
| A specific time For example: 8:40am | 17:20 | | | | |
| Accept ✓ | Do not accept x | | | | |
| ✓ Any unambiguous, correct indication eg 08.40, 8.40, 8:40, 0840, 8 40, 8-40, twenty to nine, 8,40 ✓ Unambiguous change to 12 or 24 hour clock eg 17:20 as 5:20pm, 17:20pm | Incorrect time eg 8.4am, 8.40pm Incorrect placement of separators, spaces, etc or incorrect use or omission of 0 eg 840, 8:4:0, 084, 84 | | | | |

| Responses involving coordinates For example: (5, 7) | | | | | |
|--|--|--|--|--|--|
| Accept ✓ | Do not accept x | | | | |
| ✓ Unconventional notation eg (05,07) (five, seven) x y (5,7) ($x = 5, y = 7$) | ✓ Incorrect or ambiguous notation eg (7,5) y x (7,5) (5x,7y) (5 ^x ,7 ^y) (x-5,y-7) | | | | |

| Accept ✓ | Take care ! Do not accept x | | |
|---|--|--|--|
| ✓ Equivalent decimals, fractions and percentages eg 0.700, ⁷⁰/₁₀₀, ³⁵/₅₀, 70.0% | The first four categories of error belo should be ignored if accompanied by an acceptable response, but should not be accepted on their own. However, to avoid penalising the first three types of error below more than once within each question, do not award the mark for the <i>first</i> occurrence of each type of error unaccompanied by an acceptable response. Where a question part carries more than one mark, only the final mark should be withheld. | | |
| ✓ A probability correctly expressed in one acceptable form which is then incorrectly converted, but is still less than 1 and greater than 0 eg $\frac{70}{100} = \frac{18}{25}$ | A probability that is incorrectly expressed eg 7 in 10 7 over 10 7 out of 10 7 from 10 | | |
| | A probability expressed as a percentage without a percentage sign. | | |
| | A fraction with other than integers in the numerator and/or denominator. | | |
| | A probability expressed as a ratio eg 7:10, 7:3, 7 to 10 | | |
| | ✗ A probability greater than 1 or less than 0 | | |

Recording marks awarded on the test paper

All questions, even those not attempted by the pupil, will be marked, with a 1 or a 0 entered in each marking space. Where 2m can be split into 1m gained and 1m lost, with no explicit order, then this will be recorded by the marker as 1

The total marks awarded for a double page will be written in the box at the bottom of the right-hand page, and the total number of marks obtained on the paper will be recorded on the front of the test paper.

A total of 120 marks is available in each of tiers 3-5, 4-6, 5-7 and 6-8.

Awarding levels

The sum of the marks gained on paper 1, paper 2 and the mental mathematics paper determines the level awarded. Level threshold tables, which show the mark ranges for the award of different levels, will be available on the NAA website *www.naa.org.uk/tests* from Monday 23 June 2008.

BLANK PAGE

| | Tier & Question | | | | | Symbols | |
|---|-----------------|--|--|----|---|------------------------------------|--|
| 1 | | | | | Correct response | Additional guidance | |
| | | | | 1m | Gives two of the symbols to make a correct calculation, ie $12 \stackrel{:}{\div} 3 = 4$ or $12 = 3 \times 4$ | × Other numbers or operations used | |
| | | | | 1m | Gives two of the symbols to make a different correct calculation from any credited for the first mark | | |

| | Tier & Question | | | | Rhino crisis |
|---|-----------------|-----|-----------|---|---|
| | 6 5-7 | 6-8 | | | |
| 2 | | | | Correct response | Additional guidance |
| a | | | 1m | African (rhino) | ✓ Unambiguous indication of type eg ◆ A |
| b | | | 1m | 110 | |
| c | | | 1m | Completes the pie chart labels correctly, ie | ★ Numbers used as labels Do not accept numbers as the only labels, but ignore alongside correct labels |
| d | | | 1m | Gives a correct explanation eg There are no Javan rhinos in the captive population The captive number for J was zero | ✓ Minimally acceptable explanation eg • There aren't any • Zero (or 0) • They're only in the wild • It has got no captive population × Incomplete or incorrect explanation eg • There is no section for that type • It's so small you can't see that section • It has been missed out |

| Tie | Tier & Question | | | | | | | | |
|-----|-----------------|-------|-----|----|--|---|--|--|--|
| 3-5 | 4-6 | 6 5-7 | 6-8 | | | | | | |
| 3 | | | | | Correct response | Additional guidance | | | |
| | | | | 1m | Gives the most appropriate unit, ie metres | Unit abbreviated Accept only if unambiguous eg, for the first mark do not accept • m | | | |
| | | | | 1m | Gives the most appropriate unit, ie feet | eg, for the second mark accept • f | | | |

| Tier & Ques | tion | | Sports | |
|------------------|----------|--|---|--|
| 3-5 4-6 5-7 4 | 6-8 | Correct response | Additional guidance | |
| | or 1m | Completes both bars correctly, ie Running Tennis 0 2 4 6 8 10 12 14 16 Completes one bar correctly or Indicates the values 14 and 6 eg • Bars transposed but otherwise correct • Values 14 and 6 highlighted on the horizontal scale | <i>Bars not ruled, accurate or shaded</i> Accept provided the pupil's intention is clear <i>Bars inaccurately positioned or of</i> <i>incorrect widths</i> Condone | |

| | Tier & Question | | | | | | | | |
|----------|-----------------|-----|-----|----------------|--|------------------------|--|--|--|
| 3-5 5 | | 5-7 | 6-9 | | Correct response | Additional guidance | | | |
| a | | | | 2m or 1m | Completes all three ways of paying correctly, ie four eight forty Completes two ways of paying correctly | ✓ Responses in figures | | | |
| b | | | | 1m | 500, 200, 200 and 100, in any order | | | | |

| Tier & Question | | | Shape statements |
|-----------------|----------------|---|---|
| 6 | | Correct response | Additional guidance |
| | 2m or 1m | Makes correct decisions for all four statements, ie | ✓ Unambiguous indication eg ◆ ✓ for true and x for false |

| | Tier & Question | | | | Anniversaries |
|---|-----------------|--|-------------------|------------------|--|
| 7 | | | | Correct response | Additional guidance |
| а | | | 1m | 2002 | ✓ Unambiguous indication of year eg, for 2002 • 02 |
| b | | | 1m | 1960 | eg, for 1960 • 60 |
| с | | | 1m (U1) | 1987 | |

| | Tier & Question | | | | | Calculations |
|----------|-----------------|-----|-----|----|------------------|---------------------|
| 3-5 8 | 1 | 5-7 | 6-8 | | Correct response | Additional guidance |
| | | | | 1m | 1891 | |
| | | | | 1m | 493 | |
| | | | | 1m | 585 | |
| | | | | 1m | 22 | |

| | Tier & Question | | | Number line | | | |
|---|-----------------|--|--|-------------|------------------|---------------------|--|
| 9 | <u> </u> | | | | Correct response | Additional guidance | |
| | | | | 1m | -3 | | |
| | | | | 1m | 3 | | |
| | | | | 1m | -2 | | |

| | Tier & Question | | Competitio | | | |
|---|-----------------|--|------------|-------------------|------------------|---|
| | 3 | | | | Correct response | Additional guidance |
| a | a | | | 1m | Н | |
| b | b | | | 1m | 0 | ✓ Unambiguous indication of 0 eg ◆ None |
| с | с | | | 1m (U1) | 4 | |

| Tier & Question | | | | | | Eight times | |
|-----------------|--|--|---|---|------------------|---------------------|--|
| 4 | | | | | Correct response | Additional guidance | |
| | | | 1 | m | 100 | | |
| | | | 1 | m | 10 | | |

| Tie | Tier & Question | | | | Adding | |
|-----|-----------------|-------|-----|-------------------------|--|---------------------|
| 3-5 | 4-(| 6 5-7 | 6-8 | | | 0 |
| 12 | 5 | | | | Correct response | Additional guidance |
| | | | | 2m | Gives all three correct digits in the correct positions, ie $ \begin{array}{c c} $ | |
| | | | | <i>or</i> 1m (U1) | Gives two correct digits in the correct positions | |

| Tie 3-5 | | uest | | | | Grid patterns | | |
|------------|---|------|-----|----|--|--|--|--|
| <u>-5</u> | | | 0-0 | | Correct response | Additional guidance | | |
| a | a | | | 1m | Indicates squares to make a pattern with exactly two lines of symmetry eg | ! Squares not shaded Accept any unambiguous indication of squares ! Response uses part squares Accept provided the intended symmetry is clearly correct eg, for part (b) ! Line(s) of symmetry drawn Ignore, even if incorrect | | |
| b | b | | | 1m | Indicates square(s) to make a pattern with exactly one line of symmetry eg | | | |

| | Tier & Question 3-5 4-6 5-7 6-8 | | | | | Think of a number |
|-----------|------------------------------------|-----|-----|-------------------|--|---|
| 3-5 14 | | 5-7 | 6-9 | | Correct response | Additional guidance |
| a | a | | | 1m | Indicates the correct decisions for all three questions, ie Yes No even number? ✓ multiple of 3? ✓ factor of 18? ✓ | ✓ Unambiguous indication eg ◆ ✓ for yes and ★ for no |
| b | b | | | 1m (U1) | 15 | |

| | Tier & Question | | | | | Dial |
|---|-----------------|--|--|----|------------------|---|
| | 8 | | | | Correct response | Additional guidance |
| a | a | | | 1m | 2 | |
| b | b | | | 1m | 135 | \checkmark Answers of 135 + any multiple of 360 |

| | Tier & Question | | | | | Temperatures |
|----|-----------------|--|--|----|------------------|---------------------|
| 16 | 9 | | | | Correct response | Additional guidance |
| a | a | | | 1m | 6 | |
| b | b | | | 1m | -3 | |

| Tie | Tier & Question | | uestion | | | Making ten |
|-----------|-----------------|----------|---------|----|--|--|
| 3-5 17 | | 5-7 1 | 6-8 | | Correct response | Additional guidance |
| | | | | 1m | Gives two numbers, one positive and one negative, that add to 10 eg • -10 and 20 • 15 and -5 • -1 and 11 • -0.5 and 10.5 | ✓ Fractions or decimals ★ Addition symbol amended eg • 20 - 10 = 10 |

| | Tier & Question | | Decimal | | | | |
|----|-----------------|---|---------|----|------------------|------------------------------------|--|
| 18 | 3 11 | 2 | | | Correct response | Additional guidance | |
| | | | | 1m | 7.2 | ✓ Equivalent fractions or decimals | |
| | | | | 1m | 0.2 | | |

| - | | uest | | | Duckweed |
|---|-------|------|----|---|--|
| | 12 | | | Correct response | Additional guidance |
| a | a | a | 1m | 34 | |
| b | b | b | 1m | 26 | ! Follow-through Accept follow-through as 60 – their (a), provided their (a) was not 0 |
| с | с | с | 1m | 16 | |
| d | ł d d | d | 1m | Gives a correct interpretation eg When salt is added, the number of leaves decreases and the more salt there is, the quicker the number of leaves will be zero With no salt, the plant grows but the more salt you put in, the faster the plant dies With no salt the leaves increased, with a little salt they decreased slowly, and with a lot of salt they decreased quickly | ✓ Minimally acceptable interpretation eg The more salt, the faster the number of leaves goes down As the amount of salt increases, the plan dies more quickly The more salt there is, the fewer leaves the plant will have The less salt, the more leaves the plant will have |
| | | | Ul | | <i>x</i> Incomplete or incorrect interpretation eg Adding salt makes it lose leaves rather than grow them Salt kills the plants The more salt, the more chance the plant will die |

| | Tier & Question | | | | |
|-------|-----------------|----|-----------------------------------|--------------------------|--|
| 19 13 | | -0 | Correct response | Additional guidance | |
| | | 1m | Indicates both correct shapes, ie | ✓ Unambiguous indication | |

| Tier & Q | | | Substituting | |
|----------|----------------|---|---|--|
| 21 14 | 0-0 | Correct response | Additional guidance | |
| | 2m or 1m | eg a 3, 6 3, 9 3, 1 a 1, 4 2, 6 6, 2 a 4, 7 4, 12 4, $\frac{4}{3}$ a 0, 3 0, 0 0, 0 0, 0 | ✓ Negatives, fractions or decimals ! Decimal answers rounded or truncated Accept answers rounded or truncated to two decimal places or better ★ Incomplete processing eg, for the last part 3, ³/₃ 6, ⁶/₃ | |

| Tier 8 | & Qu | estion | | | Poyoe |
|--------|------|--------|----|--|---|
| 3-5 4 | -6 5 | -7 6-8 | 3 | | Boxes |
| 22 1 | | | | Correct response | Additional guidance |
| | | | 2m | 925 | |
| | | | or | | |
| | | | 1m | Shows a complete correct method with not more than one computational error eg • $37 \times 100 = 3700$ $3700 \div 2 = 1850$ $1850 \div 2$ • $\frac{30 7}{20 600 140}$ $5 150 45 \ (error)$ so $600 + 150 + 140 + 45 = 935$ • 37 $\frac{\times 25}{185}$ $\frac{640}{640} \ (error)$ $\frac{825}{185}$ | * Conceptual error eg • 37 <u>×25</u> 185 <u>74</u> 259 |

| | r & C | | | | | $3\frac{1}{2}$ times table |
|----|-------|---|-----|----------|--|---|
| | 4-6 | | 6-8 | | Correct room on co | |
| 24 | 16 | 1 | | | Correct response | Additional guidance |
| а | а | а | | 1m 1m | 14 $17\frac{1}{2}$ or equivalent | ! For the second mark, follow-through Accept as their value for the first mark $+3\frac{1}{2}$ |
| | | | | 1m | 210 | |
| b | b | b | | 1m | Indicates No and gives a correct explanation The most common correct explanations: Reason about odd and/or even multiples of $3\frac{1}{2}$ eg • 11 is an odd number so you will get a half left over • $2 \times \frac{1}{2} = 1$, so only an even number of $3\frac{1}{2}$ s will give a whole number Show or imply the correct product or a relevant portion of it eg • $11 \times 3\frac{1}{2} = 38\frac{1}{2}$ • $17\frac{1}{2} + 21$ • $33 + 5\frac{1}{2}$ | Incorrect statement alongside a correct explanation Ignore eg, accept 11 is an odd number, $11 \times \frac{1}{2} = 6\frac{1}{2}$ ✓ Minimally acceptable explanation eg 11 is odd The first number needs to be even All the odd ones are not whole numbers Only the even numbers are whole numbers × Incomplete explanation eg Every other multiple is a whole number It is an odd number It is not an even number It ends in 1 and $1 \times \frac{1}{2} = \frac{1}{2}$ × Incomplete or incorrect explanation eg It × 3 $\frac{1}{2}$ does not give a whole number It will end in a $\frac{1}{2}$ It × 3 $\frac{1}{2} = 33 2^{\frac{1}{2}}$ |
| | | | | U1 | | |

| | Tier & Question | | | Solving |
|---------|-----------------|----------|------------------|---|
| 25 17 8 | 8 | | Correct response | Additional guidance |
| | | 1m 1m | 3 -5 | ! Incorrect notation eg, as an answer for the first mark × 3 3x Penalise only the first occurrence ! Incomplete processing eg, as an answer for the first mark |
| | | | | • $\frac{15}{5}$ Penalise only the first occurrence |

| Tier & Questio | n | Coordina | |
|----------------|------|--|---------------------|
| 3-5 4-6 5-7 6 | -8 | | |
| 23 18 9 | | Correct response | Additional guidance |
| | 2m | Gives A as (3, 4) | |
| | or | | |
| | 1m | Gives A as (4, 3) | |
| | | or | |
| | | Shows or implies that the side length of the | |
| | | square is 4 eg | |
| | | ■ 5 - 1 = 4 | |
| | | (5, 2) seen (1, 6) seen | |
| | | | |
| | | Î. | |
| | | | |
| | | 6 - | |
| | | | |
| | | 2 – | |
| | | | |
| | | 1 5 | |
| | | | |
| | | ■ 1, 2, <u>3</u> , <u>4</u> , 5 | |
| | | 2, 3, 4, 5, 6 | |
| | | | |
| | | | |
| | | | |
| | (U1) | | |
| | Ŭ | | |

| | | | Expressions |
|----------------------------|----------------|--|---|
| 3-5 4-6 5-7 6-8 19 10 1 | | Correct response | Additional guidance |
| | 2m or 1m | Matches all three expressions correctly, ie $\begin{array}{c} & & & & \\ & & & & \\ & & & \\ & & & $ | Expression on the left matched with more than one expression on the right For 2m or 1m, do not accept as a correct match |

| Tier & C | | | | Views |
|---------------|-----------|----------------|--|---|
| 3-5 4-6 20 | 5-7 11 | | Correct response | Additional guidance |
| | | 2m or 1m | Draws both views correctly using the grid, ie Image: Image: Imag | Lines not ruled or accurate Accept provided the pupil's intention is clear Shading used Ignore Correct view from the side in a different orientation Condone eg, for 2m accept FRONT SIDE For 2m or 1m, their side view omits the middle section of the diagonal line Condone eg FRONT SIDE FRONT SIDE |

| Tier & Question 3-5 4-6 5-7 6-8 | | | Mul | | | |
|------------------------------------|----|---|-----|--------------------------|---------------------|--|
| 21 | 12 | 3 | | Correct response | Additional guidance | |
| | | | 1m | 1, 2 and 3, in any order | | |

| | & Question | | | | Test results |
|---|------------|---|-------------------|------------------|---------------------|
| | 13 | | | Correct response | Additional guidance |
| a | a | a | 1m | 11 | |
| b | b | b | 1m (U1) | 12 | |

| Tier & Question | | | | Square tiles | |
|-----------------|----|---|------------------|--|---|
| 23 | 14 | 5 | | Correct response | Additional guidance |
| | | | 1m (U1) 1m | Gives a correct value for the area of the rectangle eg 54 5400 Shows the correct unit for their area eg cm ² [with 54] mm ² [with 5400] | ! Area incorrect or omitted, but units given If the mark for their correct area has not been awarded, condone cm ² seen for the second mark |

| Tie | Tier & Question | | | | Walking to school | |
|-----|-----------------|----|---|------|--|---------------------|
| 3-5 | 4-6 | | | | | _ |
| | 24 | 15 | 6 | | Correct response | Additional guidance |
| | a | a | a | 1m | 20 | |
| | b | b | b | 2m | 28 | |
| | | | | or | | |
| | | | | 1m | Gives an answer of 72 | |
| | | | | (U1) | or Shows or implies a correct method eg • 7×4 • 0.28 • 7 out of 25 • $\frac{7}{25}$ | |

| Tie | er & Q | uest | ion | | | 100 metres |
|-----|-----------|------|-----|----------------|---|--|
| 3-5 | 4-6 25 | | | | Correct response | Additional guidance |
| | a | a | a | 1m | 4 | |
| | b | b | b | 2m or 1m | 2.8 or equivalent Identifies the values 13.6 and 16.4 or equivalent or Shows a complete correct method with not more than one computational error eg 16 - 13 = 3, 0.6 - 0.4 = 0.2, 3 - 0.2 | <i>For 1m, key not interpreted</i> Condone only if the correct range has been evaluated eg, accept 2 8 eg, do not accept 16 4 - 13 6 <i>x For 1m, conceptual error</i> eg 16 - 13 = 3, 0.6 - 0.4 = 0.2, 3 + 0.2 = 3.2 |
| | | С | С | 1m | 15.3 or equivalent | |

| | er & C | | | | | Sequences |
|-----|--------|-----------------|---|-----------------|--|---|
| 3-3 | | <u>-7</u> 17 | | | Correct response | Additional guidance |
| | | a | a | 2m | Makes all four correct decisions, ie increasing decreasing neither V | |
| | | | | <i>or</i> 1m | Makes three correct decisions | |
| | | b | b | 1m | Gives all four correct terms in any order eg • $\frac{1}{4}, \frac{1}{9}, \frac{1}{16}, \frac{1}{25}$ | ✓ Equivalent fractions ! Equivalent decimals For ¹/₄, accept 0.25 For ¹/₉, accept 0.11 or better For ¹/₁₆, accept 0.0625 For ¹/₂₅, accept 0.04 ! Incorrect further working Condone provided the four correct terms have been given × Answer of 1, ¹/₄, ¹/₉, ¹/₁₆ × Incomplete processing eg, for ¹/₄ • ¹/_{2²} |

| | Tier & Question | | | | | Equation |
|-------|-----------------|-----------|--|----------|---|---|
| 3-5 / | | 5-7 18 | | | Correct response | Additional guidance |
| П | | | | 2m | -12 | |
| | | | | or 1m | Shows or implies a correct first step of algebraic manipulation that either reduces the number of terms or collects unknowns on one side of the equation and numbers on the other eg • $2x = x - 12$ • $12 + 2x = x$ • $6 + x = -6$ • $2x - x = -6 - 6$ • $12 + x = 0$ | ! <i>Method used is trial and improvement</i> Note that no partial credit can be given |

| Tier & Question | | | | Cancelling |
|-----------------|--|----|------------------|---|
| 19 | | | Correct response | Additional guidance |
| | | 1m | 20 | |
| | | 1m | 400 | Incomplete processing Penalise only the first occurrence, provided all redundant values have been cancelled eg, for both marks •4 × 5 (4 × 5)² Mark as 0, 1 Follow-through For the second mark, accept the square of their 20 evaluated |

| | Fier & Question | | | Marking overlay available | Finding Atlanta | |
|---------|-----------------|-----------|----------------|---|--|--|
| 3-5 4-6 | | 6-8 11 | | Correct response | Additional guidance | |
| | | | 2m or 1m | Indicates a point within the region shown on the overlay and shows correct intersecting construction arcs with radii within the tolerances as shown on the overlay Indicates a point within the region shown on the overlay, even if the construction arcs are incorrect or omitted Or Draws at least one correct construction arc with radius within the tolerance as shown on the overlay Or The only error is to transpose the distances, ie indicates a point within the region shown on the overlay when turned over and shows their two correct intersecting construction arcs | For 2m, intersecting arcs shown but point not otherwise labelled Condone Arcs extended or extra arcs Ignore inaccuracies in sections of arcs extending beyond the tolerances as shown on the overlay, or arcs not indicated on the overlay, even if incorrect Spurious arcs Do not accept arcs drawn without compasses | |

| er & 0 | Quest | _ | | | Twice as fa |
|--------|-------|---|---|--|---|
| | 21 | | | Correct response | Additional guidance |
| | | 2 | m | Gives both correct pairs of coordinates, ie (16, 3) and (8, 3) in either order | |
| | | 0 | r | | |
| | | 1 | m | Gives one correct pair of coordinates with the other pair incorrect or omitted | |
| | | | | or | |
| | | | | Identifies both correct points on the graph, even if the coordinates are incorrect or omitted | ! Correct points marked on the graph, but alongside other points marked For 1m, do not accept unless the two correct points are clearly identified |

| | Tier & Question | | | | | | | | | Functions | |
|-----|-----------------|-----------|--|----------|---|---------------------|--|--|--|-----------|--|
| 3-5 | 4-6 | 5-7 22 | | | Correct response | Additional guidance | | | | | |
| | | | | 2m | Makes correct decisions for all four functions, ie $\$ q increases $\$ q decreases | | | | | | |
| | | | | | \checkmark r increases r decreases \bigcirc s increases \checkmark \checkmark s decreases | | | | | | |
| | | | | or 1m | $\int t \text{ increases} \checkmark t \text{ decreases}$ Makes three correct decisions | | | | | | |

| ier & Question | | | | Red and blue cub |
|----------------|------|------|--|---------------------|
| | 3 14 | | Correct response | Additional guidance |
| | | 2m | Gives the number of blue cubes as 35 | |
| | | or | | |
| | | 1m | Shows the value 5, with no evidence of an incorrect method for that value | |
| | | | or | |
| | | | Shows the values 20 and 35, or 30 and 35 eg • 20 : 35 • 35, 30 | |
| | | | or | |
| | | | Shows a complete correct method eg • $10 \div (6-4) \times 7$ • $7 \times \frac{10}{2}$ | |
| | | (U1) | 2 | |

| Tier & Que | stion | | | Straight lines |
|------------|-----------|-----------|---|--|
| 3-5 4-6 5- | | | - | - |
| a | 15 | 1m | Correct responseIndicates No and gives a correct explanationThe most common correct explanations:Show how (7, 12) fails to follow the rule $y = 2x + 1$ eg• It should be $x \times 2 + 1$ to get y but $7 \times 2 + 1 = 15$, not 12• It should be 7 then subtract 2, but it should be double 7 then add 1• It should be $12 - 1$ then $\div 2$ but this gives $5\frac{1}{2}$, not 7• If the x-coordinate is a whole number, the y-coordinate will always be an odd numberShow or imply that the point (7, 15) or $(5\frac{1}{2}, 40)$ is a state of the state of | Additional guidance \checkmark Minimally acceptable explanation eg $\circ 7 \times 2 + 1 \neq 12$ $\circ (12 - 1) \div 2 \neq 7$ $\circ y = 2x - 2$ \checkmark Incomplete explanation eg $\circ 7 \times 2 + 1 = 15$ $\circ (12 - 1) \div 2$ \circ the y-coordinate will always be odd \checkmark Minimally acceptable explanation eg |
| | | | ($5\frac{1}{2}$, 12) is on the straight line eg • It should be (7, 15) since $7 \times 2 + 1 = 15$ • ($5\frac{1}{2}$, 12) is on the line because $12 - 1 = 11$ and $11 \div 2 = 5\frac{1}{2}$ • It's not one of these coordinates: $\boxed{\frac{x y}{4 9}}{\frac{5 11}{6 13}}{\frac{7 15}}$ | (7, 15) (5¹/₂, 12) 15, not 12 5¹/₂, not 7 (4 + 3, 9 + 6) (6, 13) is on the line so (7, 12) can't be since 12 is less than 13 When x goes up 1, y goes up 2 x <i>Incomplete or incorrect explanation</i> eg It doesn't fit the equation The y coordinate is too low You don't get to (7, 12) Only (6, 13) and (8, 17) are on the line |
| b | b | 1m | Gives a correct equation eg • $y = 3x + 1$ • $3x - y = -1$ | ! Unconventional notation eg • 1y = 3 × x + 1 Condone ! Incomplete processing eg • y = 2x + 1 + x Condone |

| | Tier & Question | | Square root | | |
|-------|-----------------|-------------|-------------|--|--|
| 3-5 4 | 1-6 5- | | | Correct response | - |
| | 23 a | 5 16 . a | | Correct responseGives a correct explanationeg $9^2 = 81$ and $10^2 = 100$ and 89 is between 81 and 100 $9 \times 9 < 89$ and $10 \times 10 > 89$ | Additional guidance \checkmark Minimally acceptable explanation eg • $\$1, 100$ • $\$1, \sqrt{100}$ • $9^2 < 89 < 10^2$ • 89 is between the squares of 9 and 10 \checkmark Value for $\$89$ given eg |
| | t | b | U1 1m | 19 and 20, in either order | between 9 and 10 ! Negative values given eg • ±19 and ±20 • -19 and -20 Condone ! Answer embedded eg • 19 × 19 and 20 × 20 seen Condone × Incomplete response eg • 361 and 400 |

| Tier & Question | | ion | Heads or tai | | | |
|-----------------|--|-----|--------------|----|---|--|
| 3-5 | | 5-7 | | | | |
| | | 26 | 17 | | Correct response | Additional guidance |
| | | | | 2m | 31 or 32 or both | For 2m or 1m, value(s) qualified eg, for 2m About 31 Condone |
| | | | | or | | |
| | | | | 1m | Shows or implies a correct method with not more than one computational error, even if their final value is not a whole number eg 31.25 or 31.5 or equivalents seen 1000 ÷ 2 ÷ 2 ÷ 2 ÷ 2 ÷ 2 500, 250, 175 (error), 87.5, 43.75 | For Im, value(s) rounded or truncated Condone correct rounding or truncation at any stage within a correct method eg, for 1m accept 500, 250, 175 (error), 88, 44 |

| Tier & Question | | Coordinate net | | | |
|-----------------|----|----------------|----------|---|--|
| | 27 | | | Correct response | Additional guidance |
| | | | 1m 1m | Gives L as (-10, 0) Gives M as (30, -20) | Answers for L and M transposed but otherwise completely correct If this is the only error, ie gives L as (30, -20) and gives M as (-10, 0), mark as 0, 1 |

| Tier | Tier & Question | | | Halving | | | |
|------|-----------------|----|----|---------|--|--|--|
| 3-5 | 5 4-6 5-7 6-8 | | | | | - | |
| | | 28 | 19 | | Correct response | Additional guidance | |
| | | | a | 1m | Gives a correct justification | | |
| | | | | | The most common correct justifications: | | |
| | | | | | Evaluate $\frac{1}{2}$ of 10 ³ and 5 ³ eg • 10 ³ is 1000, so half is 500 but 5 ³ is 125 | ✓ Minimally acceptable justification eg ◆ 500, 125 | |
| | | | | | • $10^3 = 1000$, so that is 500 but 5 is 125 • $10^3 = 1000$, $5^3 = 125$ | • 1000, 125 | |
| | | | | | but $\frac{1}{2}$ of 1000 is not 125 | <i>x</i> Incomplete or incorrect justification eg • 500 • 1000 • 125 | |
| | | | | | Express the two sides of the equation in a form that enables comparison eg 0.5 × 10 × 10 × 10 = 5 × 10 × 10, not 5 × 5 × 5 | ✓ Minimally acceptable justification eg • 5 × 10 × 10, 5 × 5 × 5 • 5 × 10² ≠ 5 × 5² • 0.5 × 10 × 10 × 10 ≠ 5 × 5 × 5 | |
| | | | | | | <i>x</i> Incomplete or incorrect justification eg • 5³ is too small • It should be 10^{1.5} | |
| | | | | | Address the misconceptionegYou only divide one of the tens by 2 not all of them | ✓ Minimally acceptable justification eg You just halve one of the tens It's only one 5 and two 10s × Incomplete justification | |
| | | | | | | eg • You don't halve all of the tens | |

| Tier & Question | | | | Halving (cont) |
|-----------------|-------------|----------|---|---|
| 3-5 4-6 5-7 | 7 6-8 19 | | Correct response | Additional guidance |
| | b | 1m | Gives a correct justification The most common correct justifications: | |
| | | | Calculate $\frac{1}{2}$ of 6×10^8 eg • $\frac{1}{2}$ of 6×10^8 is 3×10^8 not 3×10^4 • It should be $6 \times 5 \times 10^7$ not 3×10^4 • $300\ 000\ 000\ not\ 30\ 000$ • $0.5 \times 600\ 000\ 000\ is$ bigger than 30\ 000 | ✓ Minimally acceptable justification eg • 3×10^{8} • $6 \times 5 \times 10^{7}$ • $300 \ 000 \ 000$ • $\frac{1}{2}$ of 600 000 000 ≠30 000 |
| | | | Address the misconception eg • You only halve the six not the power of 10 • The number will still have nine digits • It should keep 8 zeros | ★ Incomplete or incorrect justification eg 3 × 10⁴ is too small 1/2 of 10⁸ isn't 10⁴ It should be 6 × 10⁴ ✓ Minimally acceptable justification eg You only halve the 6 The power of 10 stays the same ★ Incomplete justification eg You don't halve both values |
| | c | 2m | 8.25×10^5 | Zero(s) given after the last decimal place within standard form notation Condone eg, for 2m accept 8.25000 × 10⁵ |
| | | or 1m | Shows a value equivalent to 8.25×10^5 eg • 0.825×10^6 • $825 \ 000$ or Makes an error in halving 1.65, but follows through correctly giving their answer in standard form eg • $0.325 \times 10^6 = 3.25 \times 10^5$ | |

| | Tier & Question | | | | | | | | | | | |
|-------|-----------------|---|------------|---|---------------------|--|--|--|--|--|--|--|
| 3-5 4 | -6 5- | 2 | | Correct response | Additional guidance | | | | | | | |
| | | a | 1 m | Indicates only the third statement, ie | | | | | | | | |
| | | | | more than twice as much | | | | | | | | |
| | | | | exactly twice as much | | | | | | | | |
| | | | | less than twice as much | | | | | | | | |
| | | | | not enough information | | | | | | | | |
| | | | (U1) | | | | | | | | | |
| | | b |) 1m | Indicates only the second statement, ie | | | | | | | | |
| | | | | more than twice as much | | | | | | | | |
| | | | | exactly twice as much | | | | | | | | |
| | | | | less than twice as much | | | | | | | | |
| | | | | not enough information | | | | | | | | |
| | | | U1 | | | | | | | | | |

| | Tier & Question | | | | Factorisation | |
|-----|-----------------|-----|-----------|----------|---|--|
| 3-5 | 4-6 | 5-7 | 6-8 21 | | Correct response | Additional guidance |
| | | | | 1m 1m | Completes the factorisation correctly eg • $x^2 + 7x + 6 = (x + 1)(x + 6)$ • $x^2 + 7x + 10 = (x + 2)(x + 5)$ • $x^2 + 7x + 12 = (x + 4)(x + 3)$ • $x^2 + 7x + -18 = (x + 9)(x + -2)$ • $x^2 + 7x + 3\frac{1}{4} = (x + \frac{1}{2})(x + 6\frac{1}{2})$ • $x^2 + 7x + 0 = (x + 7)(x + 0)$ Completes the factorisation correctly in a different way from any previously credited | * Factorisation given for the first mark repeated, but the order of the factors reversed eg, from $x^2 + 7x + 6 = (x + 1)(x + 6)$ for the first mark |
| | | | | | | • $x^2 + 7x + 6 = (x + 6)(x + 1)$ |

| Tier & Question | | | Shape ca | | | | | | | | |
|-----------------|--|----|----------|--|--|--|--|--|--|--|--|
| | | 22 | | Correct response | Additional guidance | | | | | | |
| | | a | 2m | $\frac{1}{20}$ or equivalent probability | | | | | | | |
| | | | or | 1 1 | | | | | | | |
| | | | 1m | Shows the values $\frac{1}{5}$ and $\frac{1}{4}$ or equivalent probabilities | | | | | | | |
| | | | | or | | | | | | | |
| | | | | Gives the answer $\frac{1}{25}$ or equivalent probability | | | | | | | |
| | | | | [ie the only error is to assume the first card is replaced] | | | | | | | |
| | | b | 1m | $\frac{1}{10}$ or equivalent probability | ! Follow-through Accept 2 × their (a) provided this gives a value grader then 0 and less then 1 | | | | | | |
| | | | Ul | | value greater than 0 and less than 1 | | | | | | |

| Tier & Question | | | | | | | | |
|-----------------|--|-----------|-----------------|---|---------------|---|--------------|-------------------|
| 3-5 4-6 5- | | 5-8 23 | | | Correct r | esponse | | Additional guidan |
| | | a | 2m | Completes al | l three rows | | | |
| | | | | Point | Above | On | Below | |
| | | | | (6, 3) | | | \checkmark | |
| | | | | (8, 5) | | \checkmark | | |
| | | | | (100, 60) | \checkmark | | | |
| | | | | (-4, -3) | | | \checkmark | |
| | | | <i>or</i> 1m | Completes ar | ny two of the | e rows corr | rectly | |
| | | b | 1m | Gives a corre $y = \frac{1}{2}x + c$ when eg • $y = \frac{1}{2}x - \frac{1}{2}x - \frac{1}{2}x - \frac{1}{2}y = x$ | here $c < 1$ | ! Unconventional notation eg • $y = \frac{1}{2} \times x - 1$ • $1y = \frac{1}{2}x + 0$ Condone | | |

| Tier & Question | | | | Dimensions | | |
|-----------------|-----|-----|-----------|-----------------|---------------------------------------|---------------------|
| 3-5 | 4-6 | 5-7 | 6-8 24 | | Correct response | Additional guidance |
| | | Π | | 2m | Makes all three correct decisions, ie | |
| | | | | | area | |
| | | | | | area | |
| | | | | | volume | |
| | | | | <i>or</i> 1m | Makes two correct decisions | |

| Tier & Question | | on | | | Speed | | |
|-----------------|--|-----------|----|--|--|--|--|
| 8-5 4-6 5 | | 6-8 25 | | 0 | • | | |
| | | | lm | 0.65 to 0.67 inclusive | Additional guidance \checkmark Equivalent fractions, decimals or percentages | | |
| | | | | | × Value of 65 to 67 inclusive without a percentage sign | | |
| | | b 1 | 1m | Indicates Thursday and gives a correct explanation The most common correct explanations: Refer to the relative speeds of the cars on the two days eg • The median was 71.5mph on Monday, but only 55mph on Thursday due to the rain • That day had a lower median speed because people drive more carefully in the rain • People drove slower on average on this day, probably because of the wet roads • It's dangerous to go too quickly in the rain, so most cars went slower on Thursday • Only about 2 cars broke the speed limit on Thursday, but 33 did on Monday | ✓ Minimally acceptable explanation eg • 71.5, 55 • Lower median • They were generally slower • Most went more slowly • More were under the speed limit • Value(s) given for the median(s) Accept 71 to 72 inclusive for Monday Accept 55 to 55.5 inclusive for Thursday • Irrelevant information eg • There was also more variation in the speeds on Thursday as some people take more care than others Ignore alongside a correct explanation × Incomplete or incorrect explanation | | |
| | | (I | U1 | Refer to the relative positions of the graphs eg Most of the Thursday line is to the left of the Monday line, so the speeds are lower The line for Monday is further along the speed axis, showing higher values | eg The cars were slower on Thursday There were no cars going faster than about 77mph on Thursday ✓ Minimally acceptable explanation eg Its line is on the left Monday's graph is further right Thursday's line is higher up so is showing lower values The line for Monday is below the other, ie at faster speeds × Incomplete or incorrect explanation eg Thursday's line is higher up Thursday's line is higher up | | |
